## ABOUT ME

Computer-engineering student with experience in software development, business innovation, and research. Committed to driving results through technical acumen and an entrepreneurial spirit.

## COMPETENCES/SKILLS

Project Management  
Python, C++, Java, SQL  
Market Research and Analysis  
Software Development for School-wide Applications  
Understanding of Copyright Law and Curatorial Procedures in Museums

## Awards

Valedictorian Class of 2022  
Provost Honors  
CIF Swimming Division 2 Championships

## LANGUAGES

English - Native  
Chinese - Advanced  
Cantonese - Advanced  
German - Intermediate

## EDUCATION

### University of California, San Diego

Computer Engineering, B.S.

2022-2025

## WORK EXPERIENCE

### Project Team Lead, The Basement UCSD

Led a team in The Basement's Blackstone Launchpad to focus on bringing art to the forefront of innovation through NFTs and personal VR museums. Conducted market research and analysis to better understand the art ecosystem.

### Junior Intern, Master Dynamic Ltd

Explored A.I softwares to generate computer-vision data (openCV) and reported results to government agencies to improve infrastructure planning.

### E-Silverslip, Gabrielino High School

Launched a school-wide software solution for students to request room transfers during independent-study periods; added metric for COVID-19 tracing on campus.

### Superintendent Advsiory Committee

Lobbied for resources directed to peer-tutoring initiatives; provided insight into topics such as mental-health, class schedule, school reopenings.
